# Central area.

Your guests enter the ship right in the central area, where floor-to-ceiling windows offer a stunning 180° view over the water.

# Lounge deck.

The lounge deck is tailor-made for a more relaxed ambience, perfect as a reception area or a laid-back chill-out zone complemented by soothing music.

# VIP deck.

The VIP deck on the first floor presents an ideal backdrop for a sophisticated reception or an elegant dinner, giving a sense of exclusivity and style.

# Outside deck.

Transform your favourite city into a breathtaking backdrop for your event: our outside deck is designed to leave a lasting impression on your guests.

# Any occasion.

The blank canvas interior and on-site facilities ask for tailor-made events that perfectly meet your wishes.

# Oceandiva cares for the planet.

We are taking the lead in eco-friendly sailing, helping to build a more sustainable future for the shipping and events sectors. Our goal is for all our venues to organise completely CO<sub>2</sub>-neutral and fossil-free events for our customers in the upcoming years. If you choose Oceandiva, you are helping to create a more sustainable future.

## Oceandiva uses CO<sub>2</sub>-reducing biofuels

Our ships in the Netherlands, Belgium and Germany operate on an advanced blend of biofuel. This biofuel is made from 100% certified waste or residual flows and ensures a standard CO<sub>2</sub> reduction of 20%. By sailing on this biofuel blend, less particulate matter and nitrogen particles are emitted into the air, improving air quality.

## The world's first carbon-neutral event ship

Oceandiva has built the world's first CO<sub>2</sub>-neutral event ship. The event ship, Oceandiva Nova, is powered by electricity and equipped with a circular waste management system. The Oceandiva Nova has received a golden certificate with a platinum label from Green Award as the first event ship in the world.

## Biologic oil

We use biodegradable oil. This reduces the oil drain by 50% relative to synthetic oil.

## Water use

To save water, the toilets are rinsed with river water. Once the water has served its purpose, it goes to designated tanks that will be picked up by a waste processing company.

## Power lock

Once moored, the ships are connected to shore power. At their home port, the ships are continually connected to shore power: an environmentally friendly measure that is increasingly being applied by governments in The Netherlands, Belgium and Germany.

## LED-lighting

For sustainability, the ships are equipped with LED lighting. LED lamps have a longer lifespan and lower energy consumption, making them an environmentally friendly lighting source.

## Sustainable partners

We are happy that many other companies share the same belief and are committed to environmental and social practices to deliver more sustainable events. Oceandiva is keen to further improve ways to go green and will continue to engage with our event partners and suppliers to increase our positive impact across everything we do.
